

NAME: Takami**DATE:** January 21, 2021 2:27 PM**DESCRIPTION OF TECHNOLOGY**

Takami is webshop for selling fishing gear

**HUMAN VALUES****TRANSPARENCY**

The code will be open source so every user can see how actually the application works. The application will go with supporting documents which will be helpful for those who do not understand the code.

IMPACT ON SOCIETY

The managers of the shop can easily present their products to the basic customer and he has the opportunity to buy whatever he wants.

STAKEHOLDERS

Kiavash Bahreini- Product owner, scrum master, Project manager

Georgios Metaxas- Product owner, scrum master, Project manager

Moni Manolov- Developer

SUSTAINABILITY

The system will use energy from the server and from every user which uses the system.

HATEFUL AND CRIMINAL ACTORS

As soon as payment option is added to the application, there is not any action that the criminal actors can perform to harm the app, unless they are hackers.

DATA

The data is stored in local database. The password of all users is encrypted.

FUTURE

In the project will be added the payment feature and will be released.

PRIVACY

The program stores an information about the user. For example email, address, first name, family name. But this information is stored locally so far.
